DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed May 23, 2005 have been fully considered but they are not persuasive.

Although written disclosure in provisional application in 60/209,520 is not identical to the Jaszczak et al (US 6,629,469 B2), original disclosure fully anticipates all claimed features in claims 1-36 where the cardiac phantom is disclose as having left ventricular assembly comprising a hollow double-layered latex balloon representing hollow chamber made of pliable material and the thickness of the balloon changes as the volume of the chamber increase and or decrease to simulate the myocardium motion (page 3, 2nd paragraph). In addition, the hollow chamber described above has shapes that simulate that heart chambers and fluid vessel allowing the fluid to be introduced into the chamber with tubing 28 and pump assembly 30 (page 4, paragraph 2). Furthermore, the cardiac phantom in the disclosure anticipates that it is designed to be used with imaging instrument where the fluid circulation and cardiac motion simulation is controlled via software to pump fluid to simulate the cardiac motion (page 5, 2nd and 3rd paragraphs). Therefore, the written disclosure in provisional application comparison to Jaszczak et al's published patent contains no new matters that would have invalidated priority claims and the previous rejection (dated September 27, 2004) is maintained. Moreover, in regard to declaration under 37 CFR 1.131 filed along with current reply, does not overcome the priority date of Jaszczak et al's patent for the above reason.

Conclusion

2. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Jung, Ph.D. whose telephone number is 571-272-4739. The examiner can normally be reached on Mon-Fri 8:30 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 09/682,430
